for all

Lenovo

For businesses, ensuring sustainability and reducing the global carbon footprint of operations is a top priority. To assist customers on their sustainability journey, Lenovo partners with leading certified providers of CO₂ Offset Services.

Lenovo **CO₂ Offset Service** supports several different initiatives which include new or extensions of existing projects, windmills, solar cells and biomass energy among others. Forestation and forest conservation are also areas we are looking into for the future.

How?

It's incredibly simple to offset CO₂ emissions with Lenovo:

Choose your CO₂ Offset option (integrated into the Serial Number) when ordering eligible devices.

Once products are shipped, Lenovo reports to its official CO₂ Offset partner.

Lenovo's CO₂ Offset partner finalises the transaction and issues a unique certificate with specific HW Serial Number(s), which Lenovo provides to your organisation.

Why?

Lenovo offers a seamless process, requiring no additional effort, to reduce your business' environmental impact:

Included in the hardware transaction, CO₂ Offset Services are easy to implement.

CO₂ compensation is based on realistic emission by product, covering production, shipment and a typical 5-year usage cycle.

CO₂ Offset Services offer a tailored approach to CO₂ compensation, directly linking to products purchased.

Dedicated to sustainability

Lenovo is a leader in sustainability, named as one of the Most Sustainable Corporations in the World Global 100 Index by Corporate Knights, and rated AA on the 2019 Hang Seng Corporate Sustainability Index.
